## PUBLIC NOTICE

Notice #06574-1  
November 19, 2013

---

This notice is to inform the public that the S.C. Department of Health and Environmental Control (Agency) is taking public comments on a corrective action plan (CAP). Section 280.67 of the S.C. Underground Storage Tank Control Regulations (R.61-92) requires that any CAP prepared to meet the requirements of 280.66 be placed on notice for public comment. The CAP addresses the cleanup of soil and groundwater contamination at the facility listed below. The contamination was caused by petroleum products that were released from the former underground storage tank system at this facility.

**FACILITY:** Former Ed's 66, 1245 Wilson Road, Newberry, SC

**APPLICANT:** Terry Environmental Services, Inc., P.O. Box 25, Summerville, SC 29484 on behalf of C.D. Coleman Oil Company, 2613 Winnsboro Road, Newberry, SC 29108.

**SUMMARY OF CAP:** Petroleum and petroleum byproducts naturally break down over time through chemical, physical, and biological processes. These processes are called natural attenuation. Terry Environmental has submitted a CAP proposing the use of the following technologies in addition to natural attenuation to clean up the contamination:

- Aggressive Fluid Vapor Recovery (AFVR): High vacuum is applied to monitoring/recovery wells. The vacuum removes petroleum free-phase product, petroleum vapors, and petroleum-contaminated groundwater from the subsurface.
- Vapor extraction: Vacuum is applied to dedicated vapor extraction wells to remove petroleum vapors from the subsurface.

**PUBLIC COMMENT PERIOD DEADLINE:** The deadline for submitting written comments is 5:00 PM, December 19, 2013. Any interested person(s) may submit written comments concerning the cleanup to the Project Manager listed below. Please bring this notice to the attention of persons whom you know will be interested in this matter. Where there is a significant degree of public interest, the Agency will hold a public hearing.
